March 3, 2025	<ul style="list-style-type: none">- created forms and submission modalities as well as other system elements while including further improvements based on feedback from supervisors.- In the file media section, a manual input field for temperature data was included.	8
March 4, 2025	<ul style="list-style-type: none">- Making a flowchart for resume submission- System design iterations based on customer input- started the vehicle's operation	8
March 5, 2025	<ul style="list-style-type: none">- Designed the user interface for vehicle operations.- Built the user interface for the resume module.	8
March 6, 2025	<ul style="list-style-type: none">- Improved the vehicle's user interface for a more visually appealing experience.- Diagnosed and resolved system issues, particularly those affecting vehicle operations.	8
March 7, 2025	<ul style="list-style-type: none">- created the user interface for the resume.- Change the font style and system design.- informed Sir Aton, Tudee, and Nathan.	8
I learned a lot about system design and development from this experience, including how to make flowcharts and improve functionality depending on user input. I improved the resume submission and car operation systems' user interfaces to make them more useful and aesthetically pleasing. In order to fix problems with the car's operating system and make sure the key deletion procedure was successful, debugging was essential.		

TOTAL NUMBER OF HOURS COMPLETED FOR THE WEEK 40 Hours
